
3MW AC Uninterruptible Power Supply

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) |Schneider Electric Hong Kong,China. An Uninterruptible Power Supply system provides emergency power when the main source fails,using batteries to ensure a continuous supply. It conditions incoming power,protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

How do I Choose an uninterruptible power supply for DC applications?

Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions. Select the appropriate DC UPS for your application. Our uninterruptible power supplies for AC applications provide a pure sine curve at the output. Select the ideal AC UPS and ensure superior system availability.

How to choose a power supply for a DC application?

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with integrated power supply or integrated battery module offer a space-saving UPS solution. Our uninterruptible power supplies for DC applications provide reliable protection against supply interruptions.

Why should you choose Phoenix Contact uninterruptible power supplies?

Ensure superior system availability with our power supply systems. Find out about power supplies,DC/DC converters,redundancy modules, and uninterruptible power supplies for various requirements and industries. Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

In regular operation, a Three Phase Uninterruptible Power Supply delivers power from the primary AC source to the load, with the rectifier and inverter maintaining stable voltage and frequency.

Uninterruptible power supply (UPS) For large-scale equipment applications (three-phase, 100 kVA or larger) Natural disasters ...

Choose a three phase power supply system from 10kVA to 2000kVA to distribute industrial power over long distances. Three (3) phase UPS balance loads for a steady, ...

An Uninterruptible Power Supply system provides emergency power when the main source fails, using batteries to ensure a continuous supply. It conditions incoming power, protecting ...

Phoenix Contact uninterruptible power supplies for AC and DC applications provide reliable protection against supply interruptions.

Features & Benefits Maximized availability 99.9999% availability Decentralized parallel architecture Replace or add modules with no ...

The Lite-On AC Uninterruptible Power Supply (UPS) provides clean, reliable AC power to mission-critical devices such as networks, computers, or servers.

Choose a three phase power supply system from 10kVA to 2000kVA to distribute industrial power over long distances. Three (3) ...

The Eaton 93PM UPS is the perfect three-phase white or gray space solution for modern data centers. The 93PM is compatible with lithium-ion UPS batteries, which are 40 percent smaller

...

DPA 60 UL, an energy-efficient modular UPS (uninterruptible power supplies) uses a 20 kW power module for power ratings from 20 to 60 kW at 208V with internal batteries.
