# Amsterdam plans new energy storage industry

Is there a roadmap for energy storage in the Netherlands?

In the Netherlands, there has also historically not been a roadmap or detailed industrial strategy with supportive legislation, policy, taxation reliefs, or investment incentives for the energy storage market.

Why does the Netherlands need energy storage?

"As the Dutch energy transition efforts accelerate, the demand for flexibility is growing also. The challenges to our electricity grid have never been greater. Without adequate energy storage, the Netherlands risks increasing grid instability and security of supply risks," Lion Storage said in its announcement.

What is the energy storage roadmap?

The government responded to some of the feedback from market participants, issuing its first Energy Storage Roadmap in June 2023. Amongst other points, this recognised the important role that energy storage will play in the coming years and the importance of market participants coming together to develop a holistic approach for storage assets.

What is the EU's electricity market reform plan?

In response to the recent volatility in the energy markets and longer-term changing nature of the electricity system, the EU Commission announced their electricity market reform plans in March 2023.

Within this article we focus on grid-scale electricity storage and examine the development of the market in the Netherlands, how ...

These solutions will include decentralised renewables (solar photovoltaics), innovative energy storage systems (including second life batteries), waste-to-energy systems ...

Amstelveen, October 20, 2025 - GIGA Storage officially opened its third major energy storage project today. Located in Amsterdam's Western Port Area, this battery is the city's largest. The ...

GIGA Storage launches Giraffe, Amsterdam's largest battery (10 MW, 47 MWh). The project supports the city's sustainable port area and strengthens the local energy network.
