
Base station site statistics

How many base stations are there in the world?

Phil Marshall, chief research officer at Tolaga Research, estimates the global number of base stations at 6.5 million sites, while Chinese equipment vendor Huawei puts the number at 7 million. Obviously China hasn't deployed nearly all of the world's base stations. The confusion arises from how you define base station.

How many base stations are there in the Interent dataset?

The dataset, provided by Shanghai Telecom, contains more than 7.2 million records of accessing the Interent through 3,233 base stations from 9,481 mobile phones for six months. For example, the following figure shows the distribution of base stations. Each node denotes a base station in Shanghai, China.

What is the global 5G base station market size?

The global 5G base station market size was estimated at USD 33,472.5 million in 2023 and is projected to reach USD 253,624.3 million by 2030, growing at a CAGR of 33.5% from 2024 to 2030. The surging demand for high-speed connectivity is a significant factor driving the growth of the 5G base station market.

Is there a limit to the number of base stations?

There is no limit to the number of base stations on an account (pretty sure you just add device and add the second base). The limitation is you can only have 5 cameras on the basic free account. So if you have over 5 cameras you're trying to split across two bases on one account you'll have to pay for the subscription to be able to do that.
