
Choose an outdoor power source or a generator

Can a portable generator be run outside?

Portable generators, which are gas-powered, must be run outside. A portable home generator can be a big help when the electricity goes out. They are not large enough to power everything in a house, but they can supply power to a few critical appliances, such as a refrigerator and lights.

How do I choose a portable generator for home use?

When shopping for an occasional home-use generator, calculate the total power draw of any appliances or devices you'd definitely like to keep running. Then, choose the smallest available portable generator that will meet these power needs, with a little extra headroom for safety and peace of mind.

Should you choose a power station or a generator?

Power stations are suitable for small-scale, short-term power needs. They are ideal if you need a portable and eco-friendly option. Generators are best for large-scale, long-term power needs. They are suitable for high-power demands and versatile usage. Consider your budget when choosing between a power station and a generator.

Do you need a generator?

A generator can keep the lights on and the music playing without missing a beat. They offer a reliable backup power source during emergencies. However, generators can be noisy and require regular maintenance. Fuel storage and refilling can also be cumbersome. Weigh these factors against your specific power needs and personal preferences.
