
Customized 50kW Mobile Energy Storage Container for Africa

What is energy storage container?

SCU uses standard battery modules, PCS modules, BMS, EMS, and other systems to form standard containers to build large-scale grid-side energy storage projects.

What is a mobile energy storage system?

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions. Maximum safety utilizing the safe type of LFP battery (LiFePO₄) combined with an intelligent 3-level battery management system (BMS);

How can a mobile energy storage system help a construction site?

Integrate solar, storage, and charging stations to provide more green and low-carbon energy. On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

What is a scalable energy storage system?

With scalable capacity options from 50kWh up to 122kWh, this robust system is ideal for commercial sites, off-grid applications, emergency backup, and remote locations that demand large-scale, flexible energy storage. Portable Power with Unmatched Flexibility
