
Does Chad have 5G base stations

Does Chad have a fibre network?

Chad finally gained access to international fibre bandwidth in 2012. Its national backbone infrastructure remains underdeveloped. The World Bank-funded Central African Backbone (CAB) project takes in Chad, while the country is also party to a Trans-Saharan Backbone project which will link a fibre cable to Nigeria and Algeria.

Are cell phones a problem in Chad?

All fixed connections via DSL, cable or satellite were counted here, but not those connected to the internet via mobile communications. The increasing prevalence of cell phones and the simultaneous decline in landline phones clearly indicate a change in Chad.

How many people in Chad have broadband?

Values above 100 percent mean that, on average, every inhabitant has more than one connection. Chad is lagging behind in the expansion of broadband internet connections. Around 18 percent of all residents have access to the internet.

Is Chad a good place to invest in telecom services?

Nevertheless, despite difficult operating conditions, large scale poverty and low spending power, Chad's telecom market offers some potential for investors to develop services given the low starting base.
