
ETRA outdoor base station

What is a tetra dib-r5 base station?

Supporting both TETRA Release 2 and TETRA Enhanced Data Service (TEDS), the DIB-R5 base station is an attractive critical communication solution for any environment where availability and comms speed are key priorities.

Why should you choose a dib-r5 outdoor base station?

Low operating costs while the coverage stays reliable. Compact & space-saving design - the DIB-R5 outdoor can be mounted on walls, antenna masts or tunnels. Critical or battery-based, portable base station solutions are demanded. Prepared for harsh environments with IP65 protection class and a temperature range from -30 to +55 °C.

What is a dib-r5 base station?

The DIB-R5 base station family is a constituent of the TETRA mobile radio system ACCESSNET-T IP and ensures the powerful and reliable mobile radio coverage across a specific area.

What is the mts1 TETRA base station?

The MTS1 TETRA base station is a small, rugged and easily deployable solution for indoor and outdoor coverage applications. Based on a new high performance hardware platform, the MTS1 not only enables diverse and rapid deployments, but also ensures that operational costs are kept to an absolute minimum.
