## El Salvador promotes solar water pumps

Who provides water services in El Salvador?

The primary water service provider in El Salvador is the National Water and Sewer Administration (ANDA). ANDA provides services to 97 percent of urban areas and 78 percent of rural areas, defining policies and regulating services as an umbrella institution.

What is a solar well pump used for?

Beyond the listed uses, solar well pumps find application in a multitude of areas, including:  
Residential water supply: Ensure a steady flow of clean water for your home. Community water projects: Provide sustainable water access to remote communities. Environmental restoration: Support ecosystem revitalization efforts.

How do solar well pumps work?

Revolutionize Your Water Pumping with Sustainable Solar Well Pumps! Harness the power of the sun with our high-performance solar-powered deep well pumps. Our advanced MPPT inverters efficiently convert solar energy into electricity, driving the pump's motor to continuously extract water from depths reaching hundreds of meters.

Why do you need a solar water pump?

Perfect for: Farm irrigation: Solar water pumps for irrigation can ensure consistent watering for your crops, regardless of location. Human and animal drinking water: Provide clean, healthy water for your family and livestock. Domestic water supply: Enjoy reliable water access in off-grid or remote areas.
