
Estonia Solar Cooling System

Does Estonia have a good energy policy?

So far, it has been a key objective of Estonian energy policy. Being a Nordic country with less sunlight than in Western and Southern Europe, Estonia has achieved a solid place at the top with its 1,923 sunny hours in the year.

Is Estonia a good country for solar power?

Meanwhile, the Estonian solar industry is also on the rise. Estonia is becoming a leader in per capita solar power production and has set the ambitious goal of being fully green-powered by 2030. Estonia ranks 6th among EU members in solar power per capita, with 596 watt per capita in 2022, up from 405 in 2021.

Will Estonia be fully solar powered by 2030?

Estonia has seen a significant increase in its solar power capacity in 2022, becoming one of the leaders in solar power per capita among EU members. With growing investments and innovative startups, it now aims to be fully green-powered by 2030.

How much solar power does Estonia have per capita?

Estonia ranks 6th among EU members in solar power per capita, with 596 watt per capita in 2022, up from 405 in 2021. Interested in investing in Estonia?
