# Grid-connected energy storage containers for Polish highways

What is Poland's energy storage subsidy?

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

Can Poland co-finance electricity storage facilities?

Poland's National Fund for Environmental Protection and Water Management (NFOSiGW) has opened a call for applications to co-finance electricity storage facilities, with funding from the Modernisation Fund. The programme has a total budget of \$1.02 billion and aims to improve grid stability and renewable energy use.

How can energy storage support Poland's electricity system?

By addressing challenges such as peak load balancing and frequency regulation, energy storage enhances the resilience and flexibility of Poland's electricity system. The storage support program is expected to begin accepting applications in the second quarter of 2025. Full details and deadlines will be published by the NFOSiGW.

Why is Poland launching a grid-scale battery system?

The introduction of this storage support program marks a key milestone in Poland's energy transformation. By enabling the deployment of grid-scale battery systems, the country is strengthening its ability to integrate larger volumes of clean energy, reduce dependence on fossil fuels, and enhance power system stability.

Only storage facilities with at least 4 MWh capacity will qualify for the funding, which will be allocated through tenders managed by the Polish government. Projects selected ...

On 23 July 2024, the National Fund for Environmental Protection and Water Management put under public consultation a new priority aid scheme entitled: "Energy storage ...

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

The requested funding for energy storage facilities, with a combined power output of over 20 GW and an energy capacity of 122 ...

Poland has launched its capex support scheme for grid-supporting BESS and PGE has revealed its long-term deployment plans.

The requested funding for energy storage facilities, with a combined power output of over 20 GW and an energy capacity of 122 GWh, totaled nearly PLN 28 billion (\$7.7 billion) - ...

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a EUR980 million initiative that's set to ...

---

Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to ...

Poland has just rolled out one of Europe's most ambitious energy storage programmes - a EUR980 million initiative that's set to transform the country's grid infrastructure. ...

Eligible projects must involve storage systems of at least 2 MW / 4 MWh, including battery containers, inverters, transformers, and related installations. Optional costs include grid ...
