## How many power signal base stations are there in Mbabane

Are NBN base stations the same as mobile phone towers?

The rules for these facilities are in Schedule 3 of the Telecommunications Act 1997 and the Telecommunications Code of Practice 2021. NBN base stations are not the same as mobile phone towers. The rules on mobile phone towers do not apply to the NBN. NBN base stations use radiofrequency electromagnetic energy (EME).

Are mobile phone and NBN base station antennas harmful?

These antennas are part of the mobile phone and NBN networks and they emit low level radiofrequency (RF) electromagnetic energy (EME). Based on current research there are no established health effects from the low level exposure to the RF EME from mobile phone and NBN base station antennas. Frequently asked questions Fact sheets

What is a mobile phone base station antenna?

There are mobile phone base station antennas on towers and buildings throughout Australia's populated areas. These antennas are part of the mobile phone network and they emit low level radiofrequency (RF) electromagnetic energy (EME).

How many mobile devices can a base station serve?

Each base station can only serve a limited number of mobile devices at a time. As the number of mobile devices in a community grows, more base stations are needed. For that reason, more antennas are needed in such crowded locations as shopping malls where there are many mobile phone users.
