How much does it cost to install solar panels on roofs in North America

How much does a solar panel installation cost?
One of the biggest cost factors for your solar panel installation is the size of the system you have installed. System size is measured in kilowatts (kW) and is determined by household energy consumption. The average cost per watt is $3.04, but larger systems often have a lower cost per watt.

How much do commercial solar panels cost?
Generally,installing solar panels on businesses costs a bit less per watt because the systems are larger,but the total costs will be higher. In 2025,the average cost for commercial solar panels is just about $2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

Should you install a solar energy system on your roof?
When you install a solar energy system, you're getting more than just solar panels on your roof. Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home.

Should you install solar panels yourself?
When you install solar yourself,you don't have to pay labor costs,customer acquisition costs,or installer profit margins. However,installing solar panels is dangerous,and taking the DIY route can void your warranties and even prevent you from connecting to the grid.
