## Inverter to 220v high power

What is a 12V inverter?

12V Inverter. A 12V inverter is an electrical device that converts 12 volts of DC power into AC power. The input power typically comes from a 12V battery. Modified sine wave power inverter can provide you 110/120V or 220/230V/240V AC power.

What is a 24V 600W inverter?

24V 600w inverter with peak power 1200w, which is a modified sine wave, converts your car battery power to AC power 110/120 Volt or 220/230/240 Volt for options, with a safe charging design to give your device multi-protection. The modified sine wave inverter's output current is less than 0.1A and the max efficiency is 90%.

What types of inverters are available?

We offer a variety of specifications and models of inverters to meet your power needs, whether for home, automotive, or travel purposes.
