
Is a new house suitable for installing solar panels

Is my house suitable for solar panels?

In the highly likely scenario your house is suitable for solar panels, guess what, we offer MCS-certified solar panel installation nationwide. Simply answer these questions, get your fixed price, and arrange your free design. South-facing roofs are best for solar panels, but east and west-facing roofs can be fine too.

Can solar panels be installed on a terraced home?

Terraced homes tend to be finetoo, but you'll need to consider available space and access. You'll have less choice as to where your panels are installed on a terraced property, and because of limited roof space, you likely won't be able to install a solar panel system bigger than 5kWp.

What if my home is not suitable for solar panels?

Another option if your home isn't suitable for solar panels is to consider battery storage. Sure battery storage works fantastically with solar panels, but battery storage still works well without solar panels.

Should you switch to solar power?

The benefits of switching to solar power are undeniable, from reducing your carbon footprint to saving money on your energy bills. If you're considering a solar panel installation, it's crucial to ensure that your home is suitable and what panels are best suited.
