## Medium-sized solar panels

What are the standardized sizes of solar panels?

There are three standardized sizes of solar panels: 60-cell, 72-cell, and 96-cell. The dimensions of 60-cell solar panels are 66 inches long and 39 inches wide (66×39), while 72-cell solar panels have dimensions of 78 inches long and 40 inches wide (78×40). The 96-cell solar panel size is not mentioned in the passage.

What size solar panels do I Need?

They can range from 77 x 39 inches to much bigger, custom-sized panels ideal for the very high, consistent energy needs of a factory or an office building. Solar panels come in three main cell sizes: 60-cell, 72-cell, and 96-cell. The most commonly used sizes for residential and commercial purposes are 60-cell and 72-cell.

What is a solar panel size?

Solar panel size is measured in watts(W) and indicates how much electricity the panel can produce under standard test conditions. Here's the key distinction every homeowner should understand: Most residential solar panels in 2025 come in three main configurations:

How do I choose the right solar panel size?

The solar panel size directly affects how much power your system can produce, how many panels you need, and whether your available roof space can support the installation. Choosing the proper system is not only about the solar panel dimensions. You should also consider wattage, number of cells, layout possibilities, and energy consumption.
