## Mobile power PD fast charging portable

Can You charge a portable charger with a power bank?

The feature you're looking for is called passthrough charging. If the power bank supports this feature, you can charge the portable charger and a connected device simultaneously. Do solar power banks work? Power banks with integrated solar panels can work, but they are very inefficient and tend to charge very slowly when using sunlight to juice up.

How much battery does a portable charger have?

You can get a portable charger with a battery capacity of 50,000mAh or more. However, it's not great if it takes all day to charge your phone. Ideally, the best portable chargers should take advantage of your device's fast charging capabilities.

Should you connect your phone to a portable charger?

By connecting your phone to a portable charger, you can recharge your device without being tied to one location. Whether you prefer a large, robust charger that can power your phone for days or a slim power bank that easily fits in your bag for a quick charge, there's a suitable option for you.

Should I buy a portable charger?

If you're using a phone and a tablet, then a portable charger with 10,000mAh or more may be worthwhile. Some people need portable chargers that offer at least 100% of their smartphone's battery, while others need even more or less. It's best to find out the battery size of your device and choose accordingly.
