
Moldova energy storage power supply is trustworthy

How important is Moldova's cross-border power system?

Geographically positioned between Romania and Ukraine, the cross-border power system of the Republic of Moldova is critical for regional energy security and regional integration with the European and Moldova-Ukraine energy markets.

Does Moldova have an electricity power system?

Moldova's electricity power system operates in parallel with Ukraine's (the Integrated Power System / Unified Power System of Russia grid), but it cannot currently operate in parallel with Romania's network, which is part of ENTSO-E. Only small quantities of electricity can be exchanged between the two systems through an island-mode operation.

Does Moldova have energy security?

Despite acceptable energy security levels in Moldova in 2019, the country faces exposure to gas supply shock risks due to its reliance on Russia for all of its gas via Ukraine. Two major supply disruptions occurred in 2006 and 2009 due to disputes between the two countries.

Does Moldova rely on external energy supply?

Source: National Bureau of Statistics of the Republic of Moldova, 2023. Overall, Moldova depends on external energy supply for 75.6% of its needs, making it vulnerable to supply shocks.
