Why is Inner Mongolia constructing a new energy storage power station?

[Photo/Xinhua]HOHHOT -- Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness new energy power for grid connection.

What is the power system of Mongolia?

The power system of Mongolia consists of the three unconnected energy systems (Central, Western and Eastern Energy System), diesel generators and heat-only boilers in off-grid areas. The Western system provides three province (Aimag) centres and its 22 district (Soum) centers with electricity imported from Russia.

How much electricity does Inner Mongolia deliver?

As of March 3, Inner Mongolia had delivered 302.85 billion kWh of electricity via UHV grids to North China, East China, and Central China, representing an 11.01 percent year-on-year increase, meeting the annual power demand of nearly 30 million people.

How many UHV transmission corridors are there in Inner Mongolia?

To support large-scale power delivery, Inner Mongolia has established eight UHV transmission corridors linking it to Tianjin municipality, as well as Shanxi, Shandong, and Jiangsu provinces, forming a robust north-south power transmission network.

The construction of a 50 MW/200 MWh Battery Storage Power Station on a 5-hectare area built upon the "Baganuur" substation in the Baganuur district of Ulaanbaatar is ...
