
Portable Power Bank EK

What is the best power bank?

I've found the best power banks usually come from Anker, but newer brands like Cuktech and Iniu are also starting to make a name for themselves. Anker's A1383 20,000mAh power bank is my top pick for its hefty battery capacity, fast-charging and built-in cable, but the Iniu P41-E2 10,000mAh power bank is a nice budget portable charger.

How much power does a power bank charge?

Power banks charge at around 80% efficiency. Most premiere flagship phones have a battery around 5,000 mAh, but a 5,000 mAh battery pack cannot charge your phone to 100%, it will be closer to 80% charged. We've tested these battery packs to see how many times they can charge an average smartphone, and how efficiently they transfer power.

How much power does a power bank give a phone?

Our testing shows that a power bank can offer your phone between 70-80% of the power it contains, or more depending on the battery. It loses the rest due to the inefficiency of the power transfer. That means a 5,000 mAh battery can fully charge a phone with a 3,500 mAh battery, like an iPhone 16.

Should you use a power bank?

Whether you own one of today's best iPhones or best Androids, you could use a power bank. Today's top phones can hold a charge longer, but if you take a lot of photos and use the newest AI features, you'll drain the battery fast.

Buy EK 170 Power Bank, 140W PD3.1 Portable Charger 24,000mAh/ 84.6Wh High Capacity with Smart Display, 170W Total Output Battery Pack for MacBook Pro iPhone 16/15/14 Series Dark ...
