
Rooftop solar panels make money

Is rooftop solar a good investment?

Rooftop solar has increasingly become an option for many households across the country. Many areas offer attractive Renewable Energy Credits (RECs) that, when coupled with federal and local incentives, can make rooftop solar an attractive financial choice that is also good for the environment.

How can I make money from solar panels on my roof?

The easiest way to make money from solar panels on your roof is through net metering. Utility users that produce solar power can feed part of the excess energy back into the grid thanks to net metering. With this billing strategy, solar clients receive credits against their electricity usage, which lowers their monthly expenses.

How much does a rooftop solar system cost?

As the Ministry of New and Renewable Energy (MNRE) says, the average cost of a rooftop solar system connected with the grid is 75 per watt. Addressing this problem, the government has introduced a solution of subsidy schemes and other incentives that have encouraged people to transition to solar power for personal or commercial use.

What makes rooftop solar power cost-effective?

Rooftop solar is increasingly cost-effective for home owners, business owners, and their communities because it provides a fixed and competitive price of electricity. Individuals and businesses have been attracted not just to the environmental benefits of solar power, but also to the ability to generate their own power.

Conclusion In conclusion, rooftop solar companies have multiple avenues to generate revenue. From the direct sale and installation of solar panels to more sophisticated financial ...
