
San Jose energy storage project settled

When will hummingbird battery energy storage project be completed?

The project is currently under construction and is expected to be completed in 2025.

esVolta, an energy storage project developer, completed a \$110 million tax equity transaction with Greenprint Capital Management to develop and construct the 300 MWh Hummingbird battery energy storage project in San Jose, California.

Which energy storage facility will provide resource adequacy support to Pacific Gas & Electric?

The energy storage facility in San Jose will provide resource adequacy support to Pacific Gas & Electric. An energy storage project at Monolith Substation, Tehachapi, CA. Image: Sandia National Laboratories esVolta announced it has secured a \$110 million tax equity transaction with GreenPrint Capital Management.

Should San Jose buy more power?

In San Jose, city energy officials say they are reluctant to procure additional power until they know which projects will actually be built. "We do not want to buy more power than we need," said panelist Lori Mitchell, director of San Jose Clean Energy, the city's publicly-owned electricity provider. "That's job No. 1."

Why did esvolta close a \$185 million Senior Secured credit facility?

Earlier this year, esVolta closed a \$185 million senior secured credit facility that provides additional development capital to secure obligations principally relating to interconnection, power purchase agreements (PPA), equipment deposits, and early pre-NTP construction funding for its 20+GWh pipeline of energy storage projects across the U.S.

Following similar pieces in 2022/23, we look at the biggest energy storage projects, lithium and non-lithium, that we've reported on in 2024.

esVolta has secured a \$110m tax equity investment from Greenprint Capital Management to fund the development of the 300MWh ...

esVolta secured \$110M financing with Greenprint Capital to build the 300 MWh Hummingbird energy storage project in San Jose, California.

The project will focus on the integration of lithium batteries and energy storage systems, creating a complete industrial chain from materials, battery cells, modules to end products, and strive to ...

San Jose, the symbolic capital of Silicon Valley, is now ground zero in California's battle over how to govern the rise of data centers used to power artificial intelligence.

The project will focus on lithium battery and energy storage system, build a complete industrial chain from materials, battery cells, ...

The tax equity is intended to support the construction of the 75 MW / 300 MWh Hummingbird battery energy storage project in San ...

In total, the project generates 875 MWdc of solar energy and has 3,287 megawatt-hours of energy storage with a total interconnection ...

esVolta, an energy storage project developer, completed a \$110 million tax equity transaction with Greenprint Capital Management to develop and construct the 300 MWh ...

The San Jose Solar project is the latest in PGEC's portfolio of renewable energy investments, pushing forward its clean energy ...
