
Solar panels installed on the roof collapsed

Can solar panels damage a roof?

Fortunately, roof damage from a solar panel installation is extremely rare because installers take precautionary steps while installing panels to prevent leaks and other damage. Like any home improvement project, using the right service provider is essential to a rooftop solar job.

What happened to rooftop solar panels?

In 2013, a fire broke out at a 300,000 square foot meat warehouse in Delanco, New Jersey. Rooftop solar panels were present. Firefighters reported that the panels caused them to change tactics while fighting the fire. The building was eventually destroyed after 29 hours. Firefighter's opinion: "Do I think we'd have had a different outcome if we could get on the roof? Sure."

Can a roofing company remove solar panels?

Removing a roof is best undertaken by a licensed and certified roofing professional. In most cases, the company that replaces your roof won't be the company that removes your panels. However, some companies offer roofing and solar panel services. Removing the panels is easy to do, but a skilled contractor should do it.

How do I avoid solar on my roof?

Another option to avoid solar on your roof entirely is to install a ground mount or join a community solar plan and receive solar energy from an offsite location. A rooftop solar panel installation is a great investment that won't lead to roof damage when you work with a professional, experienced installer.
