
Solar panels instead of roof tiles

Are solar roof tiles a viable alternative to solar panels?

Solar panels are becoming a more and more common sight on UK homes as the technology becomes both more affordable and more effective at generating renewable energy. However, a newer technology known as solar roof tiles has been growing in popularity in the US as an alternative to panels, and the UK market looks set to go the same way.

Can solar panels be installed on a tiled roof?

Be the first to leave a review. Solar panels can be installed on many roof types and the most common type in Australia are tiled roofs. The tiles are removed and stainless steel brackets are screwed to the rafters and the tiles then re-installed in the former position.

Should I replace my roof with solar tiles?

Firstly, if you don't want to replace your whole roof then solar tiles aren't the option for you. And, even if you are replacing your roof, not all homes are suitable for a solar roof as the pitch and angle must be ideal for the tiles; they cannot be angled and adjusted like traditional solar panels.

Are solar panels better than shingles?

Solar Tiles: These are smaller, thin photovoltaic cells designed to look and function like conventional roofing materials. They can replace traditional shingles or tiles, allowing the entire roof to generate electricity. 1. Efficiency: Traditional solar panels are generally more efficient than solar tiles.
