## South Sudan sells outdoor power

Does South Sudan have electricity?

South Sudan is one of Eastern Africa's major oil resource holders but exported more than 85% of its production in 2014. Only 1% of the population had access to electricity in the country in 2017.

What is South Sudan's role as a power utility?

Its role as a power utility is expected to intensify as programmes to increase electricity access in South Sudan are implemented. It is proposed under the Electricity Bill 2015 as the regulatory entity for the electricity sector in South Sudan. It would function as the energy regulator whose functions would include the creation of regulations.

Is South Sudan a good place to buy energy?

Based on independent sources from consumers and suppliers, most of-grid energy products available in South Sudan are neither standardised nor quality verified. This hinders uptake, as many households reported quality to be a main factor in their purchase decision, especially in urban areas.

How many energy companies are there in South Sudan?

There are about fourteen of-grid energy companies in South Sudan, and their services include i) selling solar products, ii) engineering, procurement, and construction (EPC), iii) independent power production (IPPs) and iv) developing mini-grids.
