## Structural type solar tiles

What are solar tiles?

Solar tiles are roofing materials that can produce energy directly from sunlight. Solar tiles are integrated into the roof itself and function as both a roofing substance and a source of energy, as opposed to conventional solar panels, which are mounted on top of an existing roof.

What is a goodwe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

Are solar roof tiles a good way to capture solar energy?

Solar roof tiles offer a new way to capture solar energy on roofs. We explore some of its characteristics, advantages, and disadvantages.

Are solar laminates compatible with roof tiles?

Solar laminates must be compatible with porous and rough-surfaced roof tiles (Guas et al., 2011). It is shown that the type of substrate tile, including its surface properties and material composition, can significantly impact the deposition process and the optoelectronic performance of the solar cells (Guas et al., 2011).
