
Tajikistan EK Uninterruptible Power Supply

Does Tajikistan have a power system?

The existing electrical transmission and distribution systems of Tajikistan, designed in the 1970s during the Soviet era, are also being upgraded and expanded, allowing transmission of power from Tajikistan to surrounding countries.

Why does Tajikistan need interconnecting power systems?

In the case of Tajikistan, it provides a bigger market to which it can sell its hydropower surpluses. In energy security terms, interconnecting power systems offers a more diverse energy supply and reduces the impact of disruptions.

Should Tajikistan increase its institutional readiness for more integrated electricity markets?

Tajikistan should increase its institutional readiness for more integrated electricity markets. Effective cross-border trade depends on a reliable power sector at the domestic level.

Why should Tajikistan regulate the power sector?

Effective regulation enforces market discipline for utilities and can contribute to their financial viability. In addition to these principles, Tajikistan would profit in appropriately preparing power sector systems and operations for expanded trading opportunities.
