# Tbilisi Base Station Communication Products

What is a communication base station?

Communication base stations are an essential element in providing a stable communication environment for mobile communication devices such as mobile phones and smartphones. The installation of 5G base stations and compact base stations (small cells) in areas where signals are congested is presently proceeding apace.

What is a mobile base station?

A mobile base station, also called a base transceiver station (BTS), is a fixed radio transceiver in any mobile communication network or wide area network (WAN). The base station connects mobile devices to the network and routes them to other terminals in the network or to the core network of a mobile operator...[Read more Explore Mobile base...](#)

What is a radio base station?

In the world of radio communications, a radio base station plays a vital role in ensuring reliable and seamless communication across a wide area. Whether used in mobile networks, professional communication systems, or emergency response scenarios, base stations are essential for facilitating voice, data, and video transmissions.
