# The actual price of solar panels

How much do commercial solar panels cost?
Generally,installing solar panels on businesses costs a bit less per watt because the systems are larger,but the total costs will be higher. In 2025,the average cost for commercial solar panels is just about $2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does a solar system cost?
If you just need a few panels for a small do-it-yourself solar project,expect to pay around $200 to $350 per panel(between $0.80 and $1.40 per watt). Note: The table below doesn't include the cost of a solar storage battery,which can add anywhere from $7,000 to $18,000 to your total solar system costs.

How much does solar cost per watt?
For reference,the national average cost of solar panels is $3.03 per watt. Solar rebates help make solar more affordable by directly lowering the upfront cost of a solar installation. If you have access to solar rebates,consider yourself lucky! They are few and far between these days.

How much do solar panels cost if I do a DIY installation?
A DIY solar installation will cost somewhere between $9,000 and $15,000,depending on the system size and equipment used. When you install solar yourself,you don't have to pay labor costs,customer acquisition costs,or installer profit margins.
