# Uninterruptible Power Supply Accessories

What is an uninterruptible power supply (UPS)?

Uninterruptible Power Supply (UPS) |Schneider Electric Hong Kong,China. An Uninterruptible Power Supply system provides emergency power when the main source fails,using batteries to ensure a continuous supply. It conditions incoming power,protecting equipment from fluctuations. We offer various UPS power supply types for different needs.

How to choose the right uninterruptible power supply?

As a result, the demands made on uninterruptible power supplies are high. When choosing the right uninterruptible power supply, particular attention should therefore be paid to longevity, energy efficiency and reliability.

What is a continuous power supply (UPS)?

UPS is the short version of "uninterruptible power supply". In many applications a continuous power supply is important because power fluctuations and outages can cause damage to control equipment as well as unexpected down time. This situation can lead to a loss of productivity and revenue.

What are UPS modules with capacitor storage?

UPS modules with capacitor storage are equipped with integrated electrochemical double layer capacitors. In case of a power fault they guarantee an uninterrupted power supply for several seconds. By using such UPS modules,processes can be completed and data saved,for instance.
