
Victoria solar energy storage enterprise

Will Trina Solar build a battery energy storage system in Australia?

Chinese PV module manufacturer Trina Solar has received the green light from the Victoria government in Australia to build a 500MW/1,000MWh battery energy storage system (BESS). Trina Solar will build the Kiewa Valley BESS in the northeastern part of the Australian state, in the Murray-Darling basin, to the east of Melbourne, the state capital.

Why did Trina Solar invest in Victoria?

Trina Solar's investment in Victoria represents part of its larger goal to achieve 6.5GW of installed renewable energy capacity across Australia. Vertically integrated solar PV manufacturer Trina Solar acts as developer on some projects across solar and energy storage, its BESS technology is manufactured and integrated by its Trina Storage arm.

What's going on with the Kiewa Valley battery storage project?

The approval of the Kiewa Valley BESS marks the second major battery storage project to have been greenlit for the Kiewa Valley region this year, following the approval of a 400MWh BESS at Dederang being developed by Mint Renewables.

When is Energy Storage Summit Asia 2025?

Our publisher, Solar Media, will host the Energy Storage Summit Asia 2025 on 7-8 October 2025 in Manila, the Philippines. You can receive 20% off your ticket using the code ESN20 at checkout. The 2024 Summit included innovative new features including a 'Crash Course in Battery Asset Management', Ask-Me-Anything formats and debate-style sessions.

PureSky Energy is a leading developer, owner, and operator of US community solar, C&I and storage projects with headquarters in Denver, Colorado. Since entering the US ...

Fotowatio Renewable Ventures (FRV) Australia has announced its acquisition of the Axedale solar and battery storage ...

The Axedale project was acquired by FRV Australia from ACEN Australia, combines 140 MW (AC) PV solar and 50 MW/100 MWh storage to supply power to 80,000 ...

China's Trina Solar has received the green light to build a 500MW/1,000MWh battery energy storage system (BESS) in Victoria, ...

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant in the state's ...

Australia activates 1.6 GWh energy storage facility with 444 Tesla Megapacks The Melbourne Renewable Energy Hub can power up to 200,000 homes during evening peak ...

Victoria's clean energy transition is accelerating with the approval of a \$453 million Battery Energy Storage System (BESS) in north-east Victoria, backed by leading Chinese firm ...

The Axedale project is a hybrid installation combining photovoltaic (PV) solar generation and battery energy storage system ...

Fotowatio Renewable Ventures (FRV) Australia has acquired the Axedale project, a hybrid solar photovoltaic (PV) and battery storage (BESS) facility. Located just 20 kilometres ...

A newly formed Australian renewables and storage developer has unveiled its first four battery projects in NSW and Victoria.
