
Whole House Solar System Cost

How much does a whole house Solar System cost?

How much does a whole-house solar system cost? The cost varies based on system size, panel efficiency, and installation requirements. On average, residential solar systems range from \$15,000 to \$30,000 before incentives, with tax credits and rebates helping cut upfront expenses.

Can a whole-house solar system save money?

While the initial installation of a whole-house solar system can be costly, there are government solar incentives and tax credits which may be available to offset expenses. These incentives, combined with long-term energy savings, can enhance the return on investment, making solar energy a financially viable solution over time.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a solar panel cost?

Some municipalities also add special inspection or net metering setup fees. Panel selection creates subtle cost differences. Standard monocrystalline panels in 2025 cost around \$0.80-\$1.00 per watt, while polycrystalline panels average \$0.60-\$0.75 per watt.
